

# A plan for Valletta/Floriana

Roy Martin, Luqa

1. Move the bus station to Triq Nelson. Create bus bays with bus number and destination clearly marked.

2. Move traders to newly built units. Include state-of-art toilets, cafes, shops, bus HQ, canteen for drivers.

3. Create a bus museum for old buses which will be compulsorily taken out of service. (Some will be kept in use as a tourist attraction).

4. Pave the area around the fountain to be used for the carnival and for exhibitions. When not in use it will be provided with sheltered seating for citizens and visitors to relax.

5. Taxis will be parked in front of Phoenicia. No private parking on Edward VII Street, nor in front of the Phoenicia. (Extra parking will be created in the car park opposite by moving the entrance and exit to Triq L-Assedju L-Kbir).

6. Line the approach to City Gate with trees and sheltered seating.

7. Construct a frieze to be attached to the City Gate depicting the history of Malta.

8. Rebuild the Opera House but turn through 90 degrees to face City Gate. Contain within the new building art workshops for sculpture, painting, photography, dance, music, drama, etc.

9. The area in front of the new Opera House to be used for open air cafes to encourage a café culture with specific emphasis on the performing arts.

10. Move the Sunday market to The Granaries.
