

Climbing for beginners

The Valletta Waterfront is offering a new experience to visitors - a state-of-the-art mobile rock climbing tower which is designed to be safe for both adults and children.

The impressive, nine-metre tower with ice climbing routes - the only one of its kind in Malta - will be on the promenade until the end of this month.

The UK-designed tower is considered to be a good introduction to the sport of climbing and for young children to sample the spirit of adventure associated with it.
